Immediacy.

'Imix' is a shining white metal. All that is - the Him we sing our songs to. 'Mediacy', middle, the go-between the 'I am here'. Sea of change, doubt, revolving memories + eng. patterns.

Formless but capable of assuming any form. Immediate potential. It has no form, no axe to grind, so it can feel all forms. Pure. Without prior intent. Immediacy depends on good will. If you haven't got it you assume an aggressive posture. Immediacy is secured in itself by knowing it is life itself. No if, and, but. I am what I am. Security/purity relation. Purity is without fear see. based in God-will, life experiencing itself. All life operates on the principle that life eng. is inherently immediate. All other energies are not to be feared because at lower level.

Pulsing eng. that • posits + establishes + re-positS: \odot .

So \odot . If you retain awareness of immediate positing you don't fall into identif. with patterned energy, + ~~not~~ go under to them.

You can focus thro' a particular idea. You can view particular worlds. All the cells are indiv. eyes \odot + each moment is in a diff. place. Yet immediate energy can focus on the needs of each.

Describing Imm. is a step down from experiencing it. Draws a line round it.

Imm. is itself. It can .'. be anywhere, do anything. It brings change to all routines. Consc. is a catalyst, a transformer. It gives new significance to routine action.

Great literature + art are created from immediacy. Spelt out. It can use estab. patterns or create new ones.

See what is operant. Good will develops at a level the situation can bear. So it improves at the correct developmental tempo, because Imm. is low in act. The King has to be imm. to keep his crown.

In-mediacy. The middle ground, Marc/Mary, the plastic subst. involving, is Mediacy. In- is male, mediacy is female. In-impregnates the female container immediately. 'In' is the Christ function in the male.

I-M Mediacy. I = Father. M = Mother. Between them as polar oppos. is tension as power flows. It sparks over the gap. The polarising into power + initiation + the memory substance of all the previous initiations. When separated out an electro dynamic space exists of potential to be either or both. The spark is when the poles fuse. Always total. Spark between I and M is Immediacy.

Polarising out is important. No spark could happen without it. Spark is flash, non-predictable, not subject to law of rotation. Unequivocal knowing of what is required. All sparks in one is the mind of God.

Not a weapon, but will of life to develop. When we serve that purpose we become aware of it - Love-Will. It is found between I and M. If in M, a being is not in the field. The naked soul is separated out from M = memory. You open up. It is essential, because ~~it~~ it must be free of content/preference/substance.

(It is in the breath.) Immediacy is not in the I because if truly in I you do not exist. The I is power. M is what power operates in + which calls for insemination.

Immediacy + breath. Breath is the channel thro which hum. flows. A secret. Breath is very important. It re-feeds the body w. life-energy. It comes in w. breath + is distributed according to where breath is placed. There are centres of distrib. for this vitality. Breath is behind ^{the} physical body. The phys is being encouraged to grow into awareness of what is behind it. Its constant transference betw can breath + body.

Breath is a carrier. Complex experience. B. carries energy to where you focus the mind. In diff. centres there is a diff. feeling tone. It does different things in different centres. Too much focus on one centre cause unbalance.

It feels like being on fire - Everything is energised.

It is important to be immediate. The problem is a stuck situation based on identification. Lay up treasures in heaven.

'Problem' can be dealt with by becoming immediate, non identified. A revolution.

Moving. Time is not ripe. The situation is to develop consciousness, not to change location. We stay + thrash it out.
