

8.4.92.

Moving.

Look at children. Tania is most vulnerable, dependent. Relating needs of individual members of family. Olivia needs to be in the family, content. T. is more grown up, dependent on people; Danny would respond well, needs men, education. Suz. needs to be in her family. Richard needs time to himself away from stress.

Family group is tense, stressed. 3 small ch. demand individual attention. Parents need to be together. Unsettled, rootless, nat. belonging here feeling in the woman. Part of her background. (Place her somewhere warm by the sea.) She grips onto the pleasurable but rootlessness is part of her. Her roots are in her family. Ball + socket that does not grip, but moves w/out friction - A nervous energy.

Roots are interchangeable. I see only a constantly moving ball + cup, with much nervous energy. No centrality. Try this, try that. Its happier in the sun, but still nervous, anxious.

Family would not alter radically by change of place. But tension would be eased in woman. (And more would be created). R. fears the tension created in him by responsibility. Is the sacrifice worth it.

R. would prefer to work year round + outdoors. Part really wants to go to W. Australia. The outdoors. Suz. likes him to take responsibility for what he wants. She waits for any better offer to make her feel better. It has to be realisable.

R. is bored. Defends himself against energy being demanded by family. It will alter as children grow. R. desperate to find solution to what to do at weekends - "do this" demands. This is 43% of R's desire to move. 44% is conditioned by Suz. 13% is for more stimulating place. Boredom is too small for business or for things to do. A struggle every wet weekend. Dread of Sundays. Weekdays are easy - I'm working. Nowhere to hide in the house.

If I packed Suz + kids to beach, and I could be by myself.

Children need example, someone to follow. They look to R. to provide that. Legitimate to take time, but it depends on R's intent. R. is happiest when close to best intent eg. to read, bike ride, etc. It is important that a proper motive is there. Children can be required to wait.

All this does not change the feeling to move. It would be easier to do outdoor things w. family in a better climate.

R. } both want to move to something better. Half and half.
S. }

Move if to better place. Otherwise not. W. Australia? Nervous. Confusion. Not trusting himself. Foggy.

Write list of profit and loss. That's practical. Debits and credits. R. + S. to do this. What is lacking, what to do to restess this.
